But first...
Let's learn
about
OpenSource

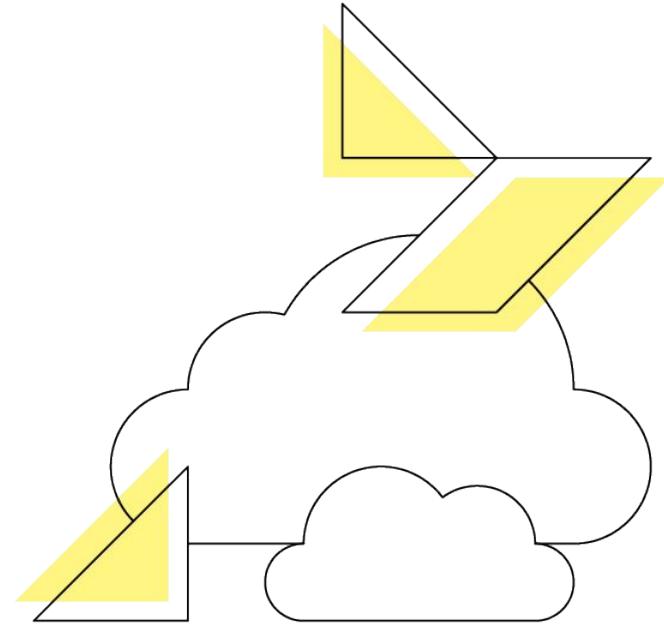

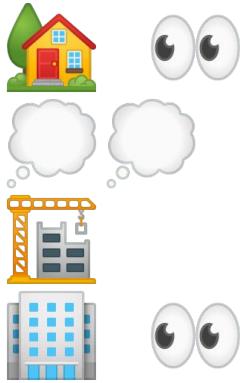

How does Open Source Works?

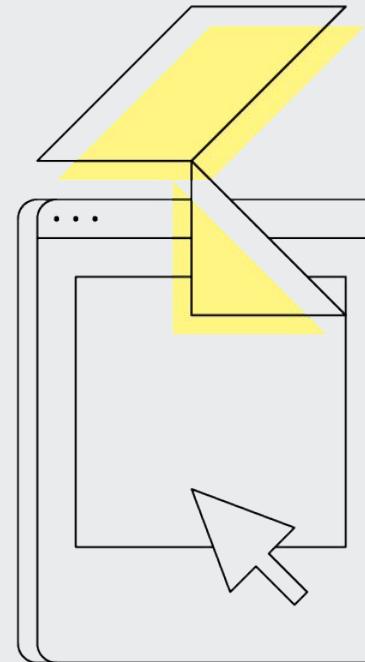

How does Open Source Works?

How does Open Source Works?

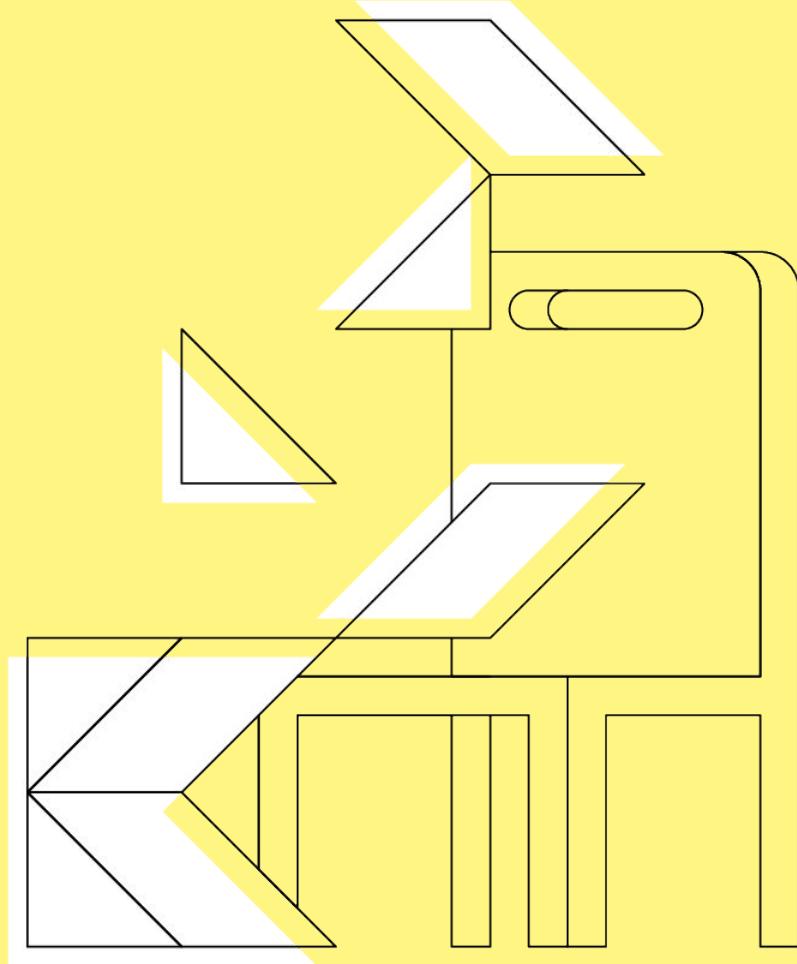

Who rules the world?

These two...

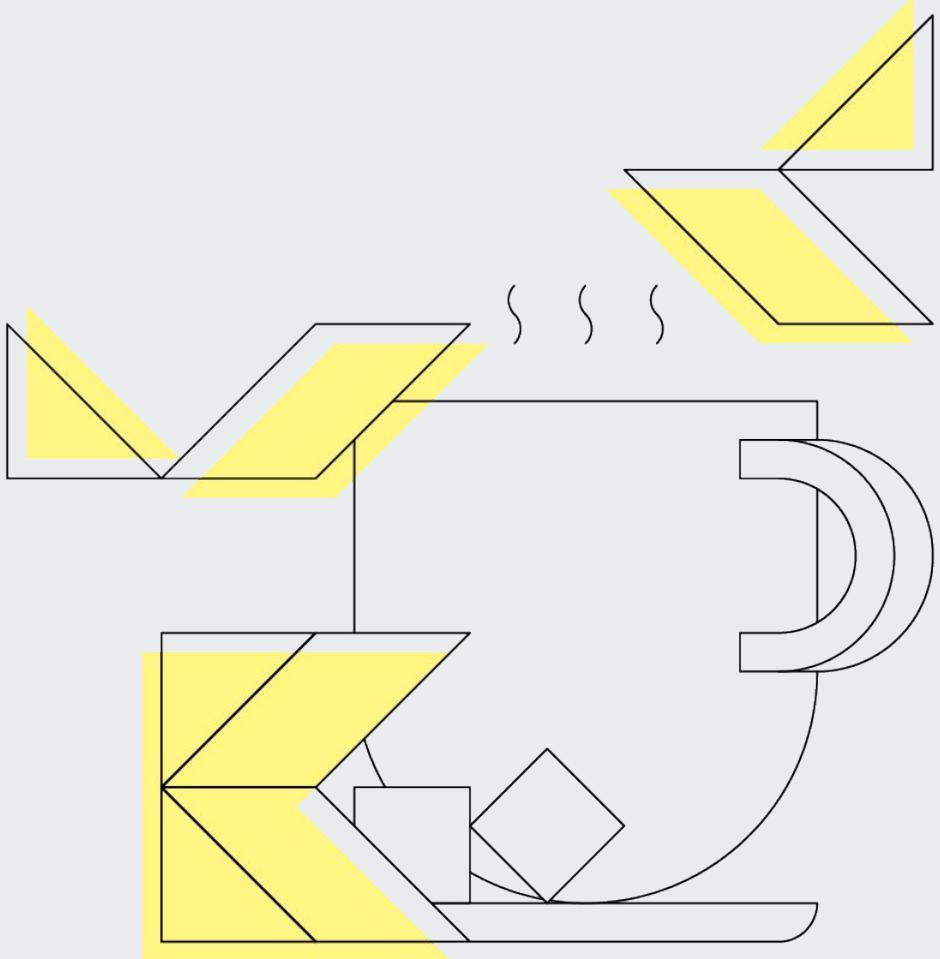

Well...
In our
And maybe
example...
this one

Okay cool... and Kotlin?

Well... First let's talk about other languages...

C, C++

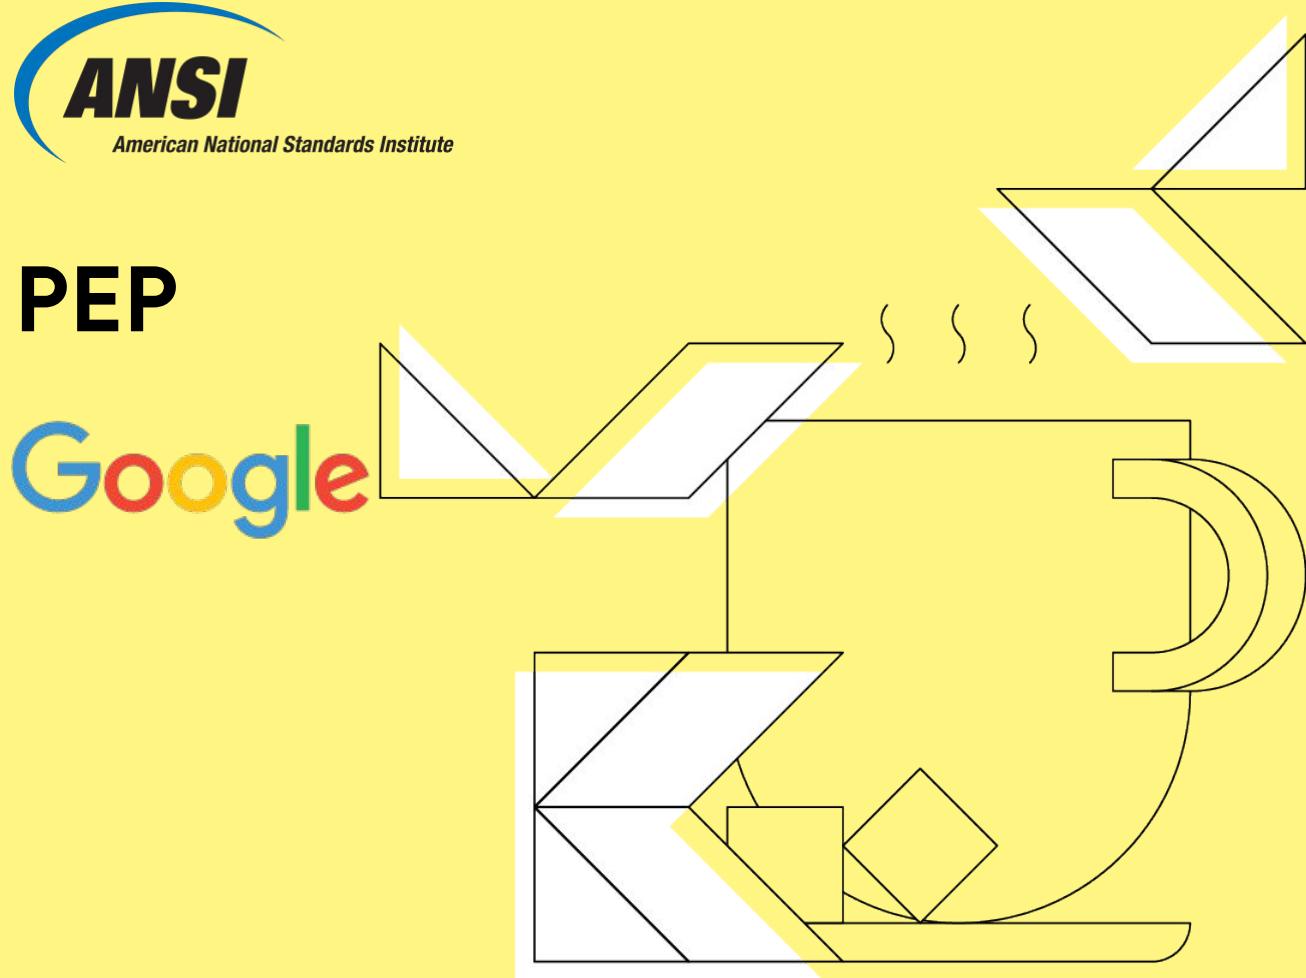

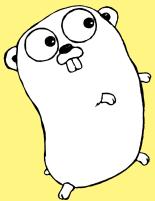

American National Standards Institute

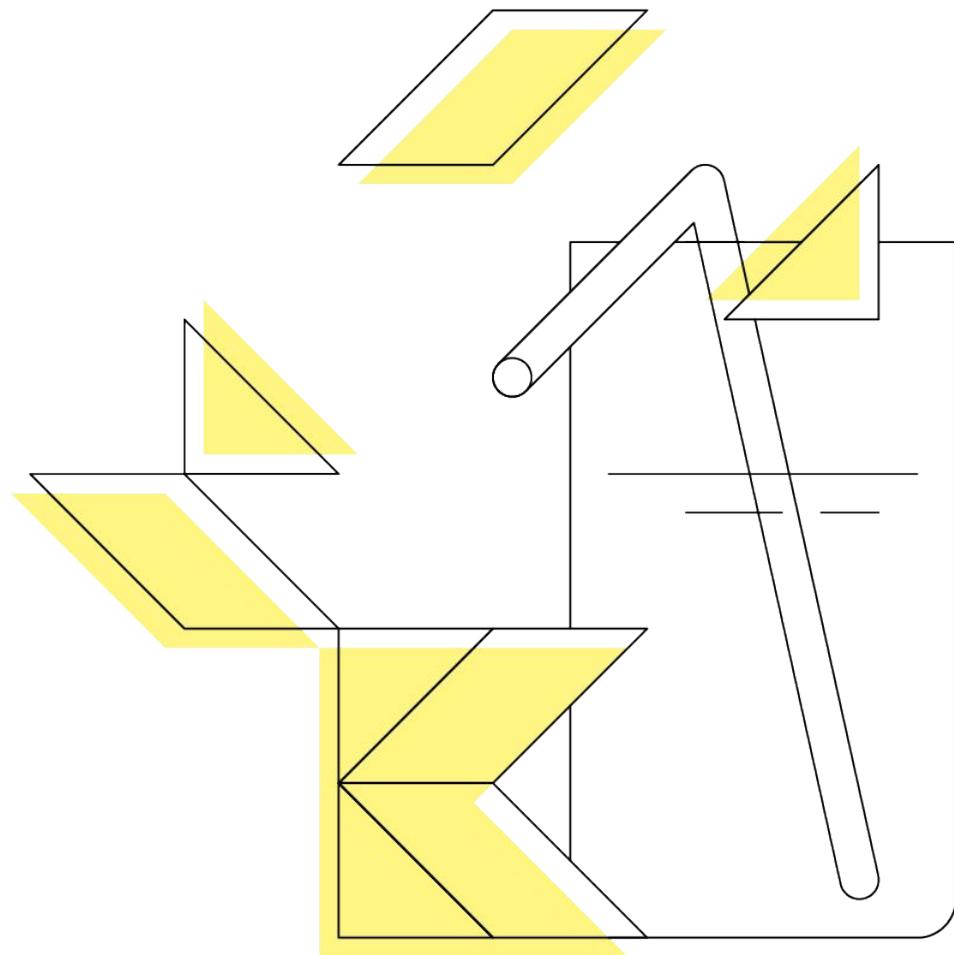

PEP

Google

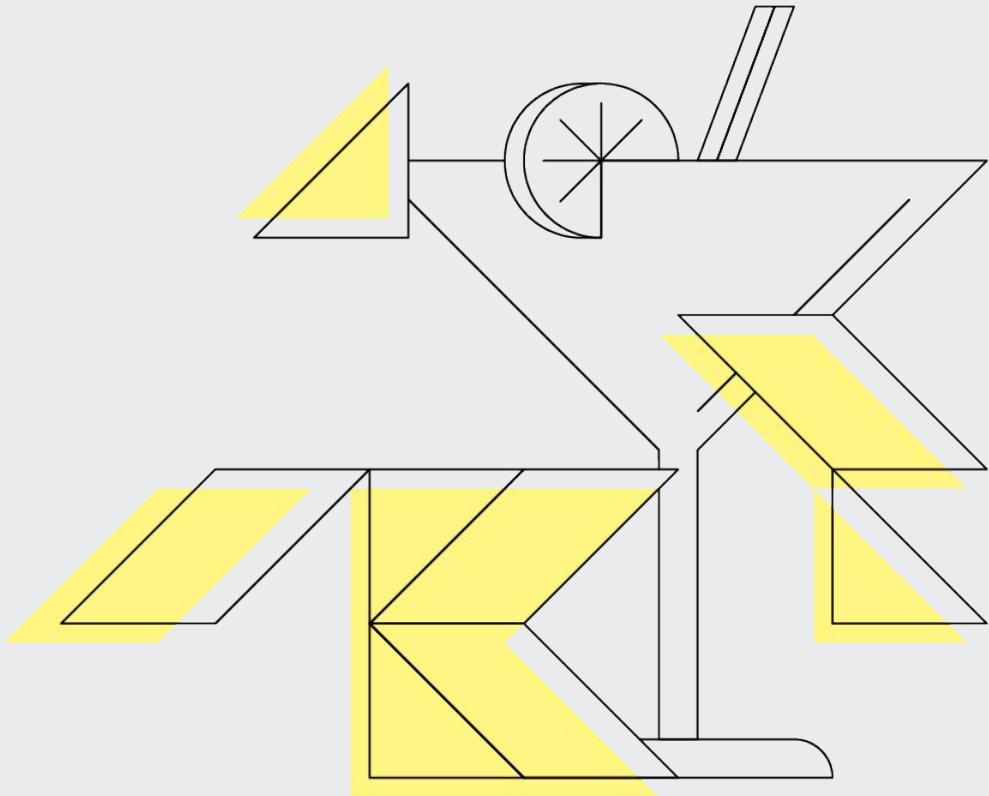

**YES! YES!
THAT'S CUTE
BUT WHAT
ABOUT
KOTLIN?**

KOTLIN EVOLUTION and ENHANCEMENT PROCESS

or KEEP to *KEEP it short*

and seein

10

Can you detail why the stdlib is the target library for the kotlinx library?

I don't think there's a clear delineation between stdlib vs. kotlinx. Coroutines were split between the two, but the future API seems to be targeting stdlib in everything. This action seems to be targeting stdlib. Like stdlib is where capturing the arguments and seeing it before this proposal, this should make sense.

Last words

Software should help people.

**Code doesn't have an opinion or care
about race, sex, genre, religion, country,
age, or anything...**

**It just works or doesn't.
Don't be afraid/scared of code**

This is for the good of all
